

We make workforce compliance simple

WorkPro is an online platform that helps manage and administer basic employment tasks.

By aggregating certain tasks in a single program, WorkPro diminishes basic administration, reduces repetition, encourages rapid engagement of individuals and transparently monitors legal compliance.

The platform offers employers the flexibility to request an individual to undertake certain tasks for easy management, tracking, recall and legal proof.

All-in-one online solution - From safety inductions, citizenship and work right checks, on-demand background checks to licence and document management, WorkPro offers a broad range of compliance tools.

Compliance protection - We dynamically update modules to align with Aus & NZ standards.

Onboarding flexibility - Choose specific tasks and build packages based on the role of the individual or the industry. Pre-built modules have been developed to address major industries and common roles to ensure a relevant program.

Easy to use - Get started in minutes, track whole workforces from the dashboard and run simple reports and filters for a quick overview of worker status.

Government accreditation - Integrated with Government databases to deliver accurate background information within minutes.

How WorkPro saves employers time and prove compliance:

- ✓ Centralising key functions reduces time and effort to hire. Key documents and information centralised online make it easy for all parties to manage, track, prove and report.
- ✓ Sophisticated multi-tiered filtering allows for quick viewing of particular information.
- ✓ The ability to customise and configure the tasks to be completed and documents to be uploaded makes it an incredibly flexible application.
- ✓ The dynamic traffic light system allows for quick viewing and administration of expiries.
- ✓ Stay on top of renewals with auto alerts 30 and 60 days from expiry with smart notifications.
- ✓ Bulk requests and submissions reduce time and effort.
